

License To Kill - Ant Control Preparation Sheet

The following is a list of the items that should be addressed prior to treatment and may or may not apply in your situation.

Trim trees and plants approximately 1 foot away from the home.

Clear gutters of dirt and leaves.

Pick up and put away items that should not be treated. This includes children's toys as well as pet food and water bowls.

Unlock property gates so technicians can enter the property.

Empty any closets or cabinets that are to be treated for ants.

Move furniture away from walls where ants are seen. This aids our technicians in treatment.
